

Lead Product Designer with 8+ years on complex digital products, specializing in no-code platforms and developer tools. At Bubble, I own design for the core editor, one of the most technically demanding surfaces in the product, and have shipped across the broader ecosystem, including a ground-up redesign of the marketplace. I own UX research, lead the build of our design system, and bring a front end development background that lets me prototype rapidly with Claude Code and contribute production-ready code directly to the codebase alongside engineering.

EXPERIENCE

Bubble | Remote (US)

Lead Product Designer

April 2025 - present

- Own product design for Bubble's core editor, the primary surface of one of the leading no-code platforms, setting design direction, raising the bar on quality, and mentoring junior designers across the team.
- Prototype and ship production-ready features using Claude Code, testing prototypes with users and contributing regularly to the codebase as a core part of the design workflow.

Senior Product Designer

July 2023 - April 2025

- Revamped our marketplace to improve discoverability and increase conversion for templates, plugins and agencies. Template views grew by 20%, installs by 16%, and revenue by 26%.
- Enhanced our Hire-a-Developer system to address low match rate and poor submission quality, improving match rate 5x (from ~2.5% to ~15%) in just 3 months.
- Led the creation of the design system, designed and built our library of components, documentation, and governance processes for 10+ designers.
- Conducted a full homepage refresh to highlight Bubble's value proposition and increase sign up conversion. A/B testing confirmed significant lifts in conversion and positive feedback from users, leading to a full rollout.
- Introduced a structured design QA process across all shipped experiences, reducing reported UI bugs and raising the overall bar for polish and consistency.

Zudy | Remote (US)

Senior Product Designer

May 2021 - July 2023

- Led product design across enterprise client applications serving hundreds of thousands of users, partnering directly with the NFL, MLB, Formula 1, and OTIS.
- Owned the design of Vinyl, Zudy's no-code SaaS platform, defining its visual identity, improving usability, and driving adoption among new users. Design work directly contributed to Zudy's successful acquisition by Jitterbit.
- Founded the company's design system from scratch, establishing components, documentation, and governance that improved consistency across all products and accelerated both design and engineering output.

Calcium

Remote (US)

UX Developer

January 2021 - May 2021

- Conducted comprehensive end-to-end UX reviews with an emphasis on WCAG 2.1 accessibility compliance, ensuring inclusive and user-friendly digital products.

LINX LLC

Wellesley (MA)

UI/UX Designer & Front-End Developer

October 2018 - January 2021

- Designed and built the front-end interfaces for all websites and internal software, improving usability and visual consistency.
- Led a complete redesign of our public websites, resulting in a more engaging user experience.
- Built responsive, scalable solutions using HTML, CSS/SCSS, JavaScript, and React, integrated with a LAMP stack back end.

Nielsen Norman Group (NN/g) *August 2022*
UX Certification (Interaction Design Specialty)
• Focus areas: UX Basic Training, Web Page UX Design, Mobile User Experience, The Human Mind and Usability, Application Design for Web and Desktop

University of Sheffield *September 2013 - June 2017*
BA (Hons) Business Management
• Graduated with a 2:1 classification

- **Design & prototyping:** Claude Code, OpenAI, Perplexity, Figma, Sketch, Framer, Adobe Creative Suite, Jitter, LottieFiles
- **Research & analytics:** Hotjar, GreatQuestion, Amplitude, Google Analytics, Lighthouse
- **Development:** HTML, CSS, SCSS, JavaScript, jQuery, React, GitHub, Storybook, Chromatic, Postman, Warp, Cursor
